MISSOURI ASSESSMENT PROGRAM  
MATHEMATICS SPRING 1998  
SCORING GUIDE  
GRADE 4

1. Students should not be penalized for omitting the following:
  - degree symbols
  - dollar signs (\$) or cent signs (¢)
  - zeros for place holders; for example, either 0.75 or .750 could be used
  - labels for word problems; for example, "miles"
2. Students should not be penalized for:
  - spelling or grammar errors
  - using abbreviations; for example, ft or feet could be used
  - adding extra answer(s) as long as the answer(s) are correct and indicated as answer(s); however, if the extra answer(s) are incorrect, one point will be deducted
3. Students should be given credit for:
  - answers not written on answer line; for example, answer could be given in work space or in explanation
4. Graphs
  - The order in which the data in bar and circle graphs are graphed is NOT important.
  - Line graphs are acceptable with or without lines connecting the points.
  - Any width of a bar in a bar graph is acceptable.
  - Students should be given full credit for graphing extra data point(s) as long as the point(s) are reasonable.
  - Students should not be penalized for compressing the interval between 0 and the first increment as long as the other intervals are consistent.
  - Bar graphs can be horizontal or vertical; however, bars must originate at the axis representing the independent variable. (See attached.)

Condition Codes:

- A. No response/refusal
- B. Insufficient work to score
- C. Off task
- D. Illegible
- E. Predominantly in another language

Content Standard(s): 5 Mathematical Systems and Number Theory  
Process Standard(s): 2.1

**Exemplary Response:**

- Drawing to show  $\frac{3}{4}$

AND

- Explanation equivalent to the following:

It means 3 out of 4. (Like when you have pizza and it's cut into 4 parts, and 3 of the pieces are gone.)

OR

Other valid explanation

**Score Points:**

|          |                    |
|----------|--------------------|
| 2 points | Exemplary Response |
| 1 point  | One component      |
| 0 points | Other              |

**Scoring Comments:**

Credit **will** be given for explanation such as “if it had another quarter it would be  $\frac{4}{4}$ ” or “ $\frac{3}{4}$  is shaded in drawing.”

If student gives an explanation only, without a drawing, then the explanation must indicate equal parts.

If a fairly accurate drawing is given, it is assumed that the parts are equal.
